HONEYCOMB STORAGE INSPIRED BY NATURE

V.Ryan © 2015 World Association of Technology Teachers

The storage system see below has been inspired by the honeycomb shapes / form, created by bees. Each storage unit is hexagonal in shape and has a similarly shaped drawer. This is an efficient and space saving shape / form, as all space is utilised. Also, individual units can be bought and a complete unit of any size can be built. The customer can mix and match colours according to his / her likes and dislikes.

1. What do you think of this design?

1. Describe how the design could be improved. You can include additional units.

3. In the space below, sketch the improvements / additions you have described in the previous question.
