This exercise can be printed and used by teachers and students. It is recommended that you view the website (www.technologystudent.com) before attempting the design sheet .

HOW TO SKETCH A SIMPLE BENTWOOD CHAIR - QUICKLY

The 'bentwood' chairs below, can be sketched simply, using a thick HB pencil or a broad 'brush' type felt pen. The strokes are bold and sketched quickly and smoothly. A detailed sketch is not needed at this stage. **HELPFUL LINK** - http://www.technologystudent.com/prddes1/thonet5.html

1. Copy of original chair	2. Sketch a faint and simple line drawing of the chair	3. Add thickness to the outline, no need to be too precise.	4. Add bold strokes and shade with a 'blunt' HB pencil or a 'brush' type felt pen.

	1. Copy of original chair	2. Sketch a faint and simple line drawing of the chair	4. Add bold strokes and shade with a 'blunt' HB pencil or a 'brush' type felt pen.

FEELING CONFIDENT?

Try drawing the chair as a faint pencil outline and then go over the lines with a broad chisel tip or brush tip felt pen. If you prefer, use a 'blunt' HB pencil. This misses out the 3rd stage.
