

# QUICK ADJUST SLIP JOINT PLIERS - WATER PUMP PLIERS

Quick Adjust Slip Pliers are general use, adjustable pliers. The bottom jaw slides to the width required and is controlled by a lock nut. They are used to grip, bend and turn materials / bolts. Round and hexagonal section material is held in the V-grip portion of the jaws. Flat material can be held in the 'flats' of the jaws. They can be adjusted to hold a wide range of sizes.
