NAME: _____

Multi-tool penknives have been under development for many centuries. In fact, the Romans had a multi-tool 'gadget' (see right). Using the existing multi-tool pen knife shown below, draw a new attachment - the next stage of development.

1. Make a list of possible modern attachments
2. Select one of the attachments and draw in the available space, on / around the penknife below.
3. Add labels and a description of the new tool.
