

SURVIVAL IN THE MODERN WORLD

STEP 1.

LEARN TO READ AND WRITE

These skills will help you communicate. Reading can increase your intelligence by understanding vocabulary and information. In college and in the real world, you will need to read. Reading skills will help you apply for a job, be successful in an interview and start a career.

STEP 2.

DEVELOP YOUR MATHEMATICS

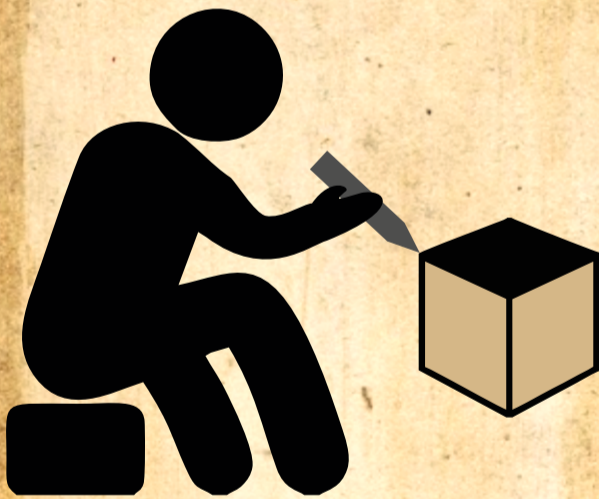

A knowledge of mathematics correlates strongly with logical thinking, problem-solving and critical thinking. These skills will help you in all jobs / careers and as a member of society.

STEP 3.

LEARN TO DRAW, SKETCH AND DESIGN

Drawing develops coordination between your hands, eyes and brain. Formal techniques and informal sketching, will help you express yourself and improve the presentation of your designs.

STEP 4.

DEVELOP ACADEMIC, PRACTICAL SKILLS

People with practical skills, exhibit a unique mix of expertise and creativity. They have the ability to successfully complete high level tasks, as an individual or as a team member, due to training, experience, talent, perseverance, motivation and practice. These are the skills that design and shape the world around you.
