# ADJUSTABLE PRODUCTS - EXAMINATION QUESTION

V.Ryan © 2011 World Association of Technology Teachers

Many products are adjustable, in order that they can be used by a wide range of potential customers. Products such as the office chair, the car wing mirror and the trolley (seen below), would be much less effective, without the 'adjustable' aspect built into their design.

For each of the products below, explain why the adjustable aspect of their design, helps meet the needs of a wider range of users.

**OFFICE CHAIR:**
