CREATING A SAFETY SYMBOL

V.Ryan © 2008 World Association of Technology Teachers

You are to create your own safety symbols by converting pictures in to simpler versions. The basic rule is to simplify a picture/pictures, removing detail so that only an outline is left. The outline of the symbol should be smooth and flow. The symbol must be recognised at a glance. In example 1 two detailed pictures have been simplified to give a final safety symbol. This symbol has been designed to remind people to close fire doors. Complete questions 2 and 3.

SYMBOL

SLOW DOWN - SPEED KILLS

CREATING A SAFETY SYMBOL

V.Ryan © 2008 World Association of Technology Teachers

Each year many people (especially young people) are killed whilst speeding on a motorbike. Look carefully at the picture of the motor bike and brick wall. Convert these detailed images into a symbol that could be used on posters and bill boards to remind young bike riders to slow down and to take care.

SYMBOL

SLOW DOWN - SPEED KILLS
