SPECIFICATION - SMALL CHARITY COLLECTION BOXES

V.Ryan © 2016 World Association of Technology Teachers

You have been approached by a children's charity called 'Be Active', to design a recyclable, flat packed collection box. It must be suitable for collecting coins and notes. It must also be possible to post the collection box through the post, in a flat form. The flat packed box should fold easily into a relatively strong collection box.

1. In the space below, write four specification points for the charity box. You should justify each specification point. An example specification point and justification has been included.

SPECIFICATION POINT	JUSTIFICATION
<i>The charity collection box will be manufactured from corrugated card so that it can be recycled.</i>	<i>Corrugated card can be recycled easily. It can be placed in a domestic recycling bin and taken to a recycling centre, where it will be put with other card products for recycling into new boxes.</i>
