INFORMATION: The symbol below (DIA 'A') advises a patient to use medicine night and day (twice over a twenty four hour period). Two new symbols have been developed from this symbol. The first advises the patient to use the medicine once during the day time. The second advises the patient to use the medicine once during the night time.

DIA. A

USE MORNING
AND EVENING

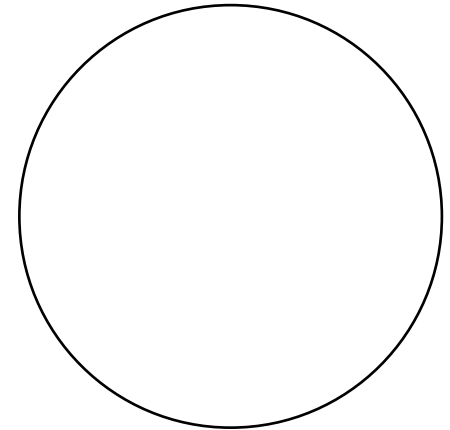

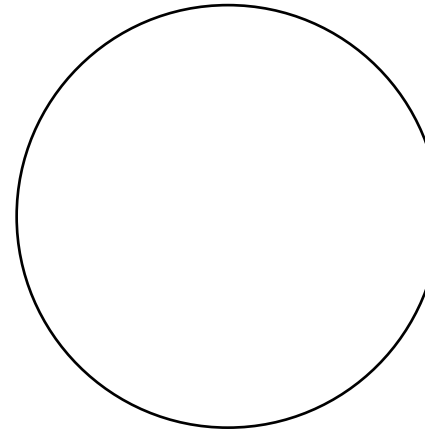

QUESTION: A pharmaceutical company has devised two creams to treat sunburn. One is to be applied during the hot summer days and the second during the cool nights.

Question: Design a symbol for each cream which emphasises when each one should be applied. Produce a rough design and a completed colour rendered version for each of your designs.

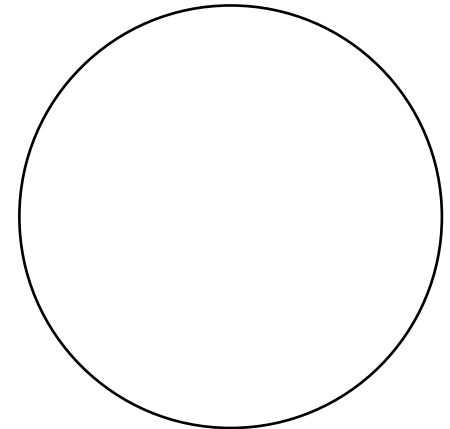

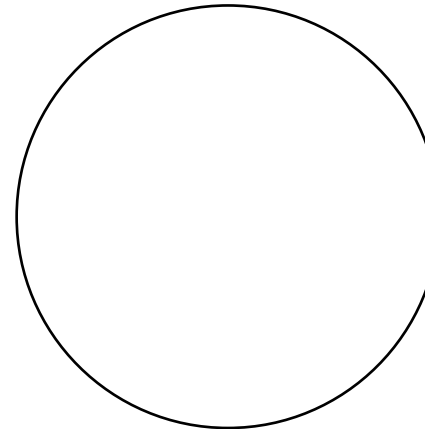

ROUGH VERSIONS

FINISHED VERSIONS

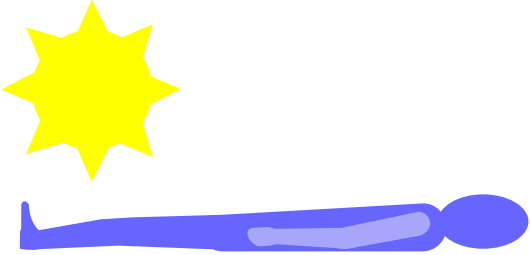

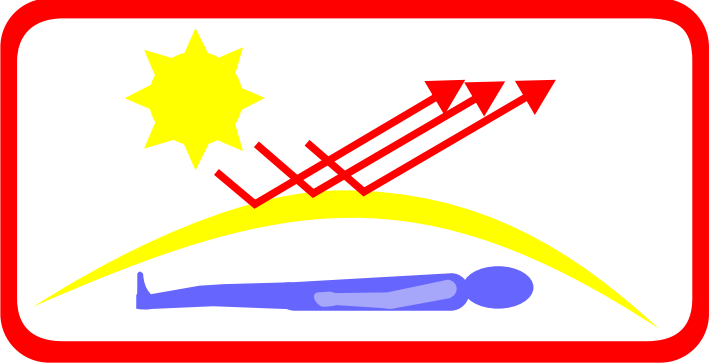

SUMMERS DAY

COOL NIGHT

A pharmaceutical company has developed a new suntan lotion. It has a factor of 100 (basically a sun block). Develop a symbol that reflects its use. The images below show the development of a symbol by a graphic designer. However, the final design is still to be completed. You are to draw the final symbol as a development of the previous three designs/ideas.

1. INITIAL IDEA		2. FIRST STAGE OF DEVELOPMENT
		
3. SECOND STAGE OF DEVELOPMENT		4. YOUR FINAL DEVELOPMENT
