FIRE RESISTANCE SYMBOL

V.Ryan © 2008 World Association of Technology Teachers

The symbol shown opposite is a sample 'stain resistance' symbol. In theory this could only be attached to fabric and furnishings that repel liquids such as black current juice. The symbol is based on a face. The nose is a droplet of liquid, dropping on to a piece of fabric. The droplet is not absorbed by the fabric but rolls/runs off it, dripping of either end.

What do you think of this sample symbol?
