**Ferrous metals contain IRON**

These are metals that contain iron. Consequently they tend to rust / suffer from corrosion. They need protecting with paint, oil or a surface finish. They react to a magnet.

**Non-ferrous metals do not contain IRON**

Non-ferrous metals do not contain iron. Consequently, they do not to rust or suffer unduly from contact with moisture. They do not react to a magnet.

---

### NON-FERROUS METALS

#### COPPER

- Reddish brown in colour, darkens slowly when in contact with air. This metal is not an alloy.
- Ductile, can be beaten into shape as it is relatively soft. Conducts electricity and heat.
- Electrical wiring, tubing, kettles, bowls, pipes and plumbing. Used also in the production of printed circuit boards.

#### BRASS

- A copper alloy. Deep yellow to golden colour. An alloy, mixture of copper and zinc 65% - 35%.
- Casts and machines well. Surface tarnishes slowly on contact with air. Conducts electricity. Resists corrosion.
- Parts for electrical fittings, engineering, ornaments, musical instruments.

#### PEWTER

- Pewter is a soft, malleable alloy, 85% to 99% tin. Other metals are copper, lead, antimony and bismuth. Has a low melting point compared to many metals (170–230 °C) making it highly suitable for casting.
- Usually purchased in ingots and cast to shape in a workshop.
- Used for making tankards and other decorative pieces.

#### BRONZE

- A copper / tin alloy. Tin content up to 10%.
- Engineers well on lathes and works quite well with handtools.
- Once used for ship fittings, due to its resistance to corrosion. Now replaced by stainless steel. Used for ornaments, cast bronze sculptures and ships propellers. Used also for bearings in engineering.

---

**NON-FERROUS METALS**

**ALUMINIUM**

- Light grey in colour. Smelted from bauxite ore. Aluminium 95%, Copper 4%, Manganese 1%
- Ductile, soft, malleable, machines well on lathes and milling machines. Very light and resists corrosion. Can be cast into products from ingots.
- Used widely in aircraft, drinks cans, window frames, ladders, and kitchen ware.
